

95176571-002001

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Yash Sharma

Serial Number: 09/474,677

Art Unit: 1644

Filed: December 29, 1999

Examiner: Ronald B. Schwadron

Title: TREATMENT AND PREVENTION OF HIV AND OTHER VIRAL INFECTIONS

DECLARATION UNDER 37 C.F.R. 1.132

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

I, Yash Sharma, declare and state that:

1. I am a U.S. citizen.
2. I have a MSc. in biochemistry from the University of Delhi, India.
3. I have a Doctorate of Homeopathic Medicine from the University of Trivandrum, India.
4. I have a Ph.D. in biochemistry from the University of London, England.
5. I have extensive experience in the field of biological sciences and chemical sciences as is detailed in the curriculum vitae attached in my previous declaration.
6. I disclosed my efforts in meetings and correspondence with the agreement that these disclosures were to be kept confidential. The following were recipients of these disclosures: Anthony Fauci, Carl Dieffenbach, Lawrence Deyton, Dr. McGowan, Carolyn Wilson, David Essayan, David Finbloom, Malcolm Moos, Kathleen Clouse, Ilana Fogelman, Abdul Alim Muhammed, Parkash Gill, Steven Turk, William Purvis,

95176571-002001

Catherine Miller, and Earl Dye. None of these recipients are inventors of any of the claims of the above-referenced invention.

7. I reviewed paragraph 8 (page 7) of September 19, 2005 Office Action. It is true that Dr. Minarcik assisted me, but he is not an inventor of any of the claims of the above-referenced application. Even Dr. Minarcik agrees that the "ideas" associated with this project were wholly mine. See Tab A, which is attached to this declaration.
8. All statements made herein of my own knowledge are true and all statements made on information and belief are believed to be true; and further these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Subject: [Norton AntiSpam] To Whom it May Concern:

> Dear Yash,

>

> To clarify the statements in my novel and sworn statement, "Diagnosis
> for Hire":

>

> */5) Last, but not least, my biggest "Hobby". For the last six years, I
> have been involved, often day and night, in the development of a drug,
> which I feel may have a key role in treating HIV. FREE of CHARGE, but
> thousands of hours of joyful work. In the mid 90's, my friend and
> colleague, and former chief Nuclear Medicine tech, Dr. Yash Sharma in /*
> */Washington/**/, /**/DC/**/, started tinkering with baboon white cells.
> Baboons do not get HIV. He (I would be wrong to say "we") found that a
> certain fraction of ground up white cells was extremely effective in
> protecting human white cells from developing HIV in the test tube. We
> called this substance "ANKA", which we told the scientific world stood
> for "Aids Natural Killing Agent", but really stood for ANna and KAmLa,
> which was the first names of our deceased mothers, and you may be the
> only other person to know this now. After a couple years of further
> experiments, we discovered that ANKA (which we also called "Lukor"
> referring to the ground up cells), was a specific disaccharide used as a
> building block of baboon cell membrane, and differed from the building
> blocks of human cell membrane by only ONE oxygen atom. The precise
> compound is called NGNA, or N-glycolylneuraminic acid. Many billion
> dollar drug companies and investment firms have shown past or current
> interest in this compound, either to develop it, or squelch it, as you
> can see from Dr. Chris Chapman's most recent report. The past 2-3 years
> have been focused on funding this compound for Phase I/II FDA trials. It
> is a totally non-toxic compound categorized as GRAS by the FDA
> (Generally Regarded As Safe). To date, there has not been one shred of
> scientific evidence, in my opinion, that it could not be a cure for
> AIDS. If the /**/US/*_/_ Attorney or his friends at AHCA or
> Columbia/HCA put me in jail, for humanitarian reasons, I hope they will
> still allow me to carry on this research. The local press seemed more
> interested in hyping my petty quarrels with HCA and AHCA, than they did
> in learning what I really do for a career and for mankind. If the drug
> proves NOT to be effective in AIDS, I still feel I am a HUGE success for
> trying. My mother always said that it is better to light one candle than
> to curse the darkness.

>

> -

>

> /*

> The birth, formulation, ideas, hard work, and all expenses behind the
> drug referred to as "Lukor", were wholly the work of YOU, and I acted as
> your medical director and medical consultant during all your years of

> hard work and sacrifice. Please note that I specifically said, "It would
> be WRONG to say we"
>
> If you need any further clarification, please let me know.
>
> Kindly,
>
> John
